

Import Compliance Guide (v2, 2024)

Classification and filing

Every imported SKU carries an HTS code assigned at onboarding and reviewed annually; classification changes require broker sign-off (Elif K.) and a note on the SKU record in Ledger. ISF (10+2) must be filed no later than 24 hours before vessel loading - late ISF is the number-one cause of customs holds in our history (see: Customs clearance checklist).

Commercial invoices must show unit values matching the PO within 2%; mismatches beyond that require a corrected invoice before entry, not after.

Import Compliance Guide (v2, 2024)

Holds, exams, and recordkeeping

If a container is selected for exam, notify operations the same day and re-plan promised dates using the exam-type SLA table: document review 2-4 days, VACIS/X-ray 3-6 days, intensive exam 7-14 days. Never promise customers a date assuming the best case.

All entry documents are retained for 5 years. Quarterly, procurement reconciles duty paid against the landed-cost model; variances above 1.5% go to the CFO pack.
